Featured Keynote and TTAC Showcase Speakers

Jeff Butler is an author and workplace strategist who explores human behavior within the working world. His experience spans over 40 industries in 4 continents on how different cultures and employees interact with each other. He studies common threads of behavior in industries such as IT professionals, underground utility workers, police officers to clothing retail chains. In addition, companies like Google, Amazon, John Deere, and Coldwell Banker.

As a researcher and practitioner, he also runs a consulting company and a tech company, TrinityFix, where he is able to test his ideas in different workplace environments. His ideas have made it to TEDx twice, appeared in dozens of media outlets including two books on human behavior:- **The Authentic Workplace** and **The Key To The New You** .

Currently, he lives in Dallas, Texas, as an out-of-place Californian.

Jordan Berg is the Technology Assessment Specialist at the National Telehealth Technology Assessment Center (TTAC). He obtained his Bachelor of Business Administration in Management Information Systems from the University of Alaska, Anchorage.

Berg has over thirteen years of hands-on experience working with the Alaska Tribal Health System, with 10 years working in telemedicine, both in programmatic and technical roles. He is passionate about working with people, helping them to understand, evaluate, and assimilate telemedicine technology.

See page 8 for the TTAC Telehealth Technology Showcase details.

Mei Wa Kwong, JD, has been named the new Executive Director for the Center for Connected Health Policy (CCHP), a program at the Public Health Institute. Ms. Kwong has been serving as Interim Executive Director since the sudden passing of CCHP's previous Executive Director, Mario Gutierrez, in August of 2017. Prior to that, Ms. Kwong was CCHP's Policy Advisor and the Project Director of the National Telehealth Policy Resource Center.

Ms. Kwong has been with CCHP since 2010. She heads numerous projects for the organization, is co-creator and co-author of CCHP's *50 State Telehealth Laws and Reimbursement Policies Report*, assists federal and state policy makers on policy issues, and is a recognized national expert on telehealth policy. Prior to joining CCHP, Ms. Kwong was the Policy Analyst for Children's Home Society of California where she worked on education and early childhood issues. She was recognized for her work by the Child Development Policy Institute. She received her Juris Doctorate from the George Washington University Law School and her undergraduate degree from the George Washington University School of International Affairs.

"No one can ever truly replace Mario who did so much not only for the telehealth field but the underserved and rural communities. As the new Executive Director, my plan is to continue on with the work Mario started to ensure telehealth can be utilized to provide services in the best way possible to those who need it," said Ms. Kwong.

The Center for Connected Health Policy is the federally designated National Telehealth Policy Resource Center. CCHP seeks to advance state and national telehealth policy to promote improvements in health systems and greater health equity. In its work as the federally designated National Telehealth Policy Resource Center, CCHP provides technical assistance to twelve regional telehealth resource centers nationwide. CCHP was created in 2008 by the California Health Care Foundation, which remains its lead funder. CCHP is a program of the Public Health Institute.

Reservations can be made by calling 574-232-7700. Please request the group rate for "UMTRC."

The Telehealth Technology Assessment Center Presents:

Telehealth Technology Showcase

What is a Technology Showcase?

The Technology Showcase is an opportunity to learn about telehealth related technology in a hands-on vendor neutral environment.

The Showcase is designed for participant interaction. Participants will be able to hold, compare and interact with innovative and emerging technology in the telehealth market space. Expect to see video and audio solutions, medical peripherals and technology to deliver care to patients at home.

TTAC staff will be on hand to answer questions about the technology present.

Who is it for?

The Showcase is useful for participants at every stage of their telehealth technology journey. Whether you are an organization or individual new to telehealth, or are planning an expansion of your program the showcase will have something for you.

Featured technologies for this event include:

- Broadband and connectivity technology
- Videoconferencing audio and video solutions
- Exam Cameras
- Direct to Consumer kits
- Telemedicine in a case
- Remote Patient Monitoring kits
- Wearable Health Monitoring Technology
